

How to Unblock the Streamlabs Bot for the MEGA GAW

IMPORTANT: During the MEGA GAW livestream, some of the LIVE giveaways will be run through the Streamlabs Bot (Cloudbot).

If you blocked the Streamlabs Bot in the past because its chat messages were annoying, you may need to unblock it before the giveaway!

On Computer

1. Make sure you're signed into the **SAME** Google/YouTube account you use to watch International Stacker.

2. Open your Google Account Blocked Users page:

Google Block Users: <https://myaccount.google.com/blocklist>

3. Look through the list for the Streamlabs account/bot you previously blocked.

4. Click the **✖** / Remove button next to that account to unblock it.

5. Return to YouTube and refresh the livestream.

YouTube confirms that channels blocked through YouTube can be unblocked from the Google Account block list.

On Phone or Tablet

The easiest method is still to open:

Google Block Users: <https://myaccount.google.com/blocklist>

Make sure you're logged into the Google account connected to the YouTube channel you'll use during the giveaway, find the blocked Streamlabs account, and remove it from your blocked list.

Why This Matters

The Streamlabs Cloudbot will be used for some of our LIVE MEGA GAW giveaways. Streamlabs specifically supports running giveaways through Cloudbot.

If you previously blocked the bot, unblock it **BEFORE** the MEGA GAW livestream so you can see its messages and interact normally during the giveaways.

 I recommend doing this ahead of time rather than waiting until we're LIVE with thousands of people in chat!

 Still Can't See the Bot?

Double-check that:

- ✅ You're logged into the correct YouTube/Google account.
- ✅ You removed the Streamlabs account from your blocked-user list.
- ✅ You refreshed/reopened the livestream afterward.

You do NOT need to unsubscribe from International Stacker or change your YouTube membership.
